

Mid Cap Dividend Value

As of September 30, 2018

Objective

Long-term capital appreciation through investments in mid-cap, dividend paying equities.

Philosophy

Typically, dividend paying stocks are only associated with larger-cap companies and the small cap companies are largely misunderstood or ignored. We believe the quality of the universe from which we generate investment ideas is inherently superior to the substantially broader universe of small cap stocks, an index, or an ETF which are cap-weighted with significant biases toward sectors and certain industries.

In addition, we believe that dividend payers offer an attractive risk-profile as they generally outperform non-dividend payers in periods where equity markets are down.

Investment Highlights

In challenging investment environments, we believe the quality of our dividend-focused portfolio, coupled with our attention to valuation, will provide some degree of downside market protection. However, not all stocks are created equal and we believe our fundamental research effort can identify the most attractive stocks within this universe.

Relative Sector Weights

	Communication Services	Consumer Discretionary	Consumer Staples	Energy	Financials	Health Care	Industrials	Information Technology	Materials	Real Estate	Utilities
Mid Cap Dividend	2.09%	9.77%	2.78%	7.67%	18.70%	6.49%	13.00%	7.84%	6.78%	13.08%	11.79%
Russell Midcap Value	3.30%	9.00%	4.93%	7.46%	17.62%	6.87%	12.63%	9.11%	6.14%	12.78%	10.16%

Strategy Characteristics

Smaller and medium-sized company stocks are more volatile and less liquid than larger, more established company securities. Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal will fluctuate so that an investor's portfolio, when redeemed, may be worth more or less than the original cost. Portfolio holdings will change, and should not be considered purchase recommendations. Top holdings and sector weights do not reflect cash, money markets or options/futures contracts holdings. The Russell Midcap Value Index measures the performance of the mid-cap value segment of the U.S. equity value universe. It includes those Russell Midcap Index companies with lower price-to-book ratios and lower forecasted growth values. Since inception benchmark returns are from 10/31/10. The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Keeley Teton Advisors, LLC. Neither MSCI, S&P nor any third party

involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. Portfolio holdings may not match the securities in the indexes and portfolio performance will differ. Direct investment in an index is not possible. Data presented herein was obtained from FactSet and eVestment. The net performance numbers shown are for informational purposes only. Management fees are negotiable and a table of standard fees is contained in the Firm's Form ADV Part 2A, which is available at no cost at www.keeleyteton.com.

Investment Process

We focus our research efforts across a broad array of dividend-paying stocks. In evaluating the overall quality of a company, we view the investment universe in four distinct areas. Depending on company-specific valuations - as well as the current macroeconomic environment, we categorize equities into each of these groups:

Attractive

These stocks demonstrate attractive qualities independent from their dividends.

Growers

We expect these companies to grow dividends faster than the market due to earnings growth and low payout ratio.

Solid-Steady

These stocks offer average yields, and grow their dividends in-line with earnings.

High-Yield

These stocks offer above-average yields that we believe are sustainable due to strong balance sheets and/or strong cash flows.

From these four categories, fundamental research helps our team assess the sustainability of a dividend by analyzing the company's cash flow, balance sheet and dividend history.
